

Students' expectations

Group 1

Individual level

What is the point of PH?

- ▶ To get knowledge about the concepts and methods related to PH
- ▶ Involvement of PH practitioner in creating health policies instead of politicians-politics

Individual level (contd.)

- ▶ To increase the role in teaching medicine and dentistry students about occupational aspects of PH
- ▶ To improve our creativity and organizational skills
- ▶ Finding difference between physician and manager!!

Community/Country level

- ▶ Bigger investments in health care programs concerning PH
- ▶ Collaboration between politicians and PH professionals in creating health policies
- ▶ Raising public health awareness (media, TV, posters...)

Community/Country level (contd.)

- ▶ Better grounded strategies for implementation of the health care reforms

Do not make health care reforms without participation of the PH professionals!

- ▶ Better allocation of health care resources
- ▶ Improvement and implementation of the current legislative for environmental and occupational protection
- ▶ Assessing critical level of PH professionals

Community/Country level (contd.)

**Deficit of professionals
competences can prove like
judgment day for the health
care reform**

Global level

Think globally act locally

- ▶ Develop the IT technologies between all SEE countries
- ▶ Improve cooperation between countries and exchanging experiences in solving PH problems
- ▶ Implementation of evidence-based PH practice

Global level (contd.)

- ▶ Reducing the number of occupational and work related diseases
- ▶ International seminars and conferences concerning evidence-based PH
- ▶ Reducing the burden of communicable diseases
